*Some Automatic and Specialty equipment not included

Drastically LOWER your risk of costly downtimes!

We all know two of the largest expenses in a production environment is **equipment repair** and **downtime**. That is why we are ready to serve you with our **Equipment Performance Assurance Program (E.P.A.P)**.

Ameripak's service professionals will perform on-site scheduled maintenance of your respective packaging machines. We service machines for normal wear items - which can greatly reduce costly failures.

Servicing your equipment will ensure the highest level of production performance and guarantee

Our factory trained technicians can repair equipment on site or transport most equipment to our facility to be repaired. We can also help troubleshoot equipment over the phone!

A preventative maintenance program usually allows the mechanics to shut the machinery down and accomplish all the required lubrication, minor repairs and adjustments that will keep the packaging line up and running for longer periods of time. This promotes higher efficiency and can reduce the random, repeated down times caused by operational failure.

Your Winning Solution!

(502) 222-8244
Service@ameripak.net

long-term cost effectiveness of capital investment.

Upon service completion, we will provide you with a comprehensive report highlighting the overall efficiency and application suitability. The report will also state the service condition of equipment and any recommendations for improvement. This can greatly reduce overall costs of operating packaging equipment, reducing consumption of raw material (i.e. film, tape, etc.) directly affecting bottom line earnings.

The value of this program is to utilize our many

years of diverse expertise in the industry, our factory trained expert service professionals and lightning fast response times, backed by our 40 years of partnerships, ensuring some of the most competitive prices in the industry.

All of these benefits add directly to the increased up time and efficiency of your packaging equipment which means added profit and production capability to you!

Ameripak is your winning solution!!

It can even prevent long periods of down time caused by a critical part or assembly failure because it didn't get the attention required.

The Ameripak Service Team can help train your maintenance staff on how to create and implement a Preventative Maintenance Program specific to your machinery and needs.
